Data Analyst - SQL Developer - ETL Developer

PROFESSIONAL SUMMARY

Results-driven MS SQL Database Developer/ETL Developer with 7+ years of experience designing, developing, optimizing and maintaining enterprise Microsoft SQL Server databases and ETL solutions. Extensive experience developing Stored Procedures, Views, Functions, Triggers, complex T-SQL queries and database objects supporting mission-critical applications. Experienced in collaborating with cross-functional stakeholders to translate business requirements into scalable data solutions that improve operational efficiency and decision-making. Recently completed postgraduate specialization in Project Management-IT and Cybersecurity. Currently leveraging leadership and Canadian business communication skills in a supervisory role while seeking a return to a Data/ETL Analyst or Software Developer position.

TECHNICAL SKILLS

- **ETL & Data Integration:** SSIS, SAP HANA, Exasol, Markit-EDM, Data Integration and Data Migration
- **Databases:** Microsoft SQL Server, Oracle (basic), Advanced SQL (joins, subqueries, data filtering), T-SQL
- **SQL Development:** Stored procedures, Views, triggers, User defined functions, CTEs, window functions, dynamic SQL, Joins, subqueries, Execution plans, backup and recovery support
- **Reporting & BI:** Power BI, MicroStrategy, Excel, Data Profiling, Data Documentation
- **Programming & Automation:** Python, Bash, sFTP scripting, Control-M, C# (basic), Visual Basic (VBA)
- **SDLC & Frameworks:** Agile, Scrum, Waterfall
- **Data Management:** Data Validation, Data Transformation, Data Governance, Data Quality Assurance
- **Database Development:** Stored Procedures, Triggers, Data Modelling, Database Design & Maintenance
- **Development & Collaboration:** JIRA, Git, SharePoint, MS Project, Agile, Scrum, Waterfall
- **Operating Systems:** Kali Linux, Ubuntu, Windows 10/11, Windows Server (2016/2019)

PROFESSIONAL EXPERIENCE

IT Analyst - ETL Developer, TATA Consultancy Services, Kochi, India **10/2021 - 10/2023**

- Designed, developed and maintained enterprise MS SQL databases ensuring high data accuracy, consistency and integrity.
- Designed and implemented SSIS-based ETL pipelines for SQL Server data migration projects.
- Developed complex Stored Procedures, Views, Triggers and T-SQL scripts to automate business processes.
- Performed data cleansing, transformation and validation to support analytics and reporting requirements.
- Developed Power BI dashboards and reports to support data-driven decision-making across business units.
- Supported database backup, migration, validation and deployment activities across Development, QA and Production environments.
- Produced technical documentation, database specifications and deployment procedures.

Technology Analyst - SSIS Developer, Infosys Limited, Bangalore, India **01/2019 - 10/2021**

- Developed and supported data-driven applications and ETL solutions using SQL Server and SSIS.
- Developed complex T-SQL Stored Procedures, Views, Triggers and User Defined Functions.
- Collaborated with business and technical teams to define and implement data integration solutions.
- Wrote and optimized complex SQL statements involving joins, aggregations, filtering and subqueries.
- Developed stored procedures, triggers and database objects to support application functionality.
- Managed ETL deployments across DEV, QA and PROD environments following SDLC standards.
- Investigated SQL performance bottlenecks and improved database response times.
- Created business and operational reports using MicroStrategy and Exasol to support reporting, analytics and stakeholder decision-making.
- Monitored data pipelines, identified inconsistencies and resolved data quality issues through detailed analysis.
- Supported backup, recovery and system reliability initiatives.
- Prepared technical documentation for database objects, ETL workflows and system configurations.

Senior Systems Engineer , Infosys Limited, Bangalore, India	11/2015 - 12/2018
• Integrated investment applications using Markit-EDM to improve data quality and system efficiency. • Developed stored procedures and scripts to enforce business rules and data validation. • Participated in full software development lifecycle (SDLC), including requirement analysis, development, testing and deployment. • Maintained code repositories and collaborated using version control tools (Git). • Worked in Agile/Scrum teams, contributing to sprint planning, development and retrospectives.	

ADDITIONAL EXPERIENCE

Head Cashier , The Home Depot, Ontario, Canada	03/2024 - Present
• Manages daily store operations and leads a front-end team to ensure high standards of accuracy and service. • Resolves technical POS system issues, demonstrating adaptability and problem-solving in a fast-paced environment. • Demonstrate leadership, communication, problem-solving and multitasking capabilities.	

EDUCATION

Postgraduate Certificate - Cybersecurity & Threat Management Seneca Polytechnic, Ontario, Canada	01/2025 - 08/2025
Postgraduate Certificate - Project Management - Information Technology Seneca Polytechnic, Ontario, Canada	01/2024 - 08/2024
Bachelor of Technology - Electronics & Communications Engineering St. Joseph's College of Engineering & Technology, Kerala, India	08/2011 - 05/2015

CERTIFICATION

AWS Academy Graduate - AWS Academy Cloud Security Foundations	02/2025
